

622703

Gaius Sense Corner basins are made of a durable and antimicrobial composite material. The basin is seamless, with fixed rails in front to support standing and ease approach. The angle of the front rim ensures that splashes stay inside the basin. Additional accent colour strips are available for the rails to promote better spatial recognition: grey (RAL 7037) or red (RAL 3003).

The basin design embodies the new European PMR standard, which requires 300 mm empty space below to allow for wheelchair access.

The side length of the cut corner basin is 560 mm, when installed the distance from the corner of the room to the front corner of the basin is 840 mm. The depth measure from the corner of the room to the centre of the front edge of the basin is 740 mm, which allows wheelchair access close enough to the basin.

A white pop-up drain plug, fixed water trap, and mounting hardware are included with the basin. The basin can be customized to not include the overflow drain opening.

Sense cut corner corner basin with overflow

Product numbers:

- **622703WAM**, all white
- **622703GAM**, with grey accents
- **622703RAM**, with red accents
