

65001 Sense corner basin

Gaius Sense Corner basins are made of a durable and antimicrobial composite material. The basin is seamless, with fixed rails in front to support standing and ease approach. The angle of the front rim ensures that splashes stay inside the basin. Additional accent colour strips (grey RAL 7037 and red RAL 3003) are available for the rails to promote better spatial recognition.

The basin design embodies the new European PMR standard, which requires 300 mm empty space below to allow for wheelchair access.

A toilet paper dispenser, a white pop-up drain plug, fixed water trap, and mounting hardware are included with the basin. The basin can be customized to not include the overflow drain opening.

The side width is 840 mm (in cut corner basin 560 mm), with 740 mm diagonal length from the corner to the front rim. Load-bearing capacity of the basin is +400 kg.

Gaius Sense Corner basin with overflow, 840 x 840 mm

Product numbers:

- 65001WAM, white
- 65001GAM, with grey accents
- 65001RAM, with red accents
