

6502 Hospital basin

Hospital basins are made of a durable and antimicrobial cast marble. The Hospital basin has fixed rails on both sides to support standing and ease approach. The rounded front edge combined with the side rails, with antimicrobial elastomeric coating, form a uniform support rail. The angle of the front rim ensures that splashes stay inside the basin. Rails are available in different accent colours (colors available: grey RAL7037 and red RAL 3003), to promote better spatial recognition.

A toilet paper dispenser, wall brackets, and fixed water trap are included with the basin. Mounting hardware sold separately. Manual or electric height adjustments are available for the model.

Hand rails can support up to 160 kg (Etteplan test). All basins have been CE-certified. The basin is customizable to come without overflow.

Hospital basin with overflow.

Product number:

- 6502RAM, with grey elastomeric rail

Product Information			
Width	800 mm	Color	white
Length	-	Rail color	grey RAL 7037
