KORPINEN

Product Information

KB102-01-INB Child protection seat

The wall-mounted child protection seat has hidden wall mountings on the entire width of the seat. Nylon seat belt further ensures safety.

Hooks are mounted into the base for easy access to care bags.

The design of the hinges eliminates the threat of fingers getting stuck.

The station is made of polyethene plastic which rejects odours and bacteria. The closed structure also helps keep it clean.

Load-bearing capacity 22 kg. When open, the depth of the seat is 315 mm.
