BASINS

Elegant Gaius basins are made of durable and antimicrobial cast marble or composite material. Basins of composite material are seamless with fixed rails, with additional accent-colour strips to promote better spatial recognition. Basins of cast marble have a uniform rail which enables support from all angles. Wheelchair access is ensured by basin design.

BASINS

GAIUS
CARE

Sense basin 900 x 576

Gaius Sense basins are made of a durable and antimicrobial composite material. The basin is seamless, with fixed rails in front to support standing and ease approach. The angle of the front rim ensures that splashes stay inside the basin. Additional accent-colour strips are available for the rails to promote better spatial recognition.

The basin design embodies the new European PMR standard, which requires 300 mm of empty space below to allow for wheelchair access. A toilet paper dispenser, a white pop-up drain plug, fixed water trap and mounting hardware are included with the basin. Right- and left-handed basins are available, classified by the direction of the tapered tail. The basin can also be customised to not include the overflow drain opening. The recommended mounting height is 800 mm.

Dimensions: W 900 mm x D 576 mm

With overflow

Sense corner basin 840 x 840

Gaius Sense corner basins are made of a durable and antimicrobial composite material. The basin is seamless, with fixed rails in front to support standing and ease approach. The angle of the front rim ensures that splashes stay inside the basin. Additional accent-colour strips are available for the rails to promote better spatial recognition. The basin design embodies the new European PMR standard, which requires 300 mm of empty space below to allow for wheelchair access. A toilet paper dispenser, a white pop-up drain plug, fixed water trap and mounting hardware are included with the basin. The basin can be customised to not include the overflow drain opening.

The side width is 840 mm, with a 740 mm diagonal length from the corner to the front rim. The recommended mounting height is 800 mm.

Dimensions: W 840 mm x D 840 mm

Sense Plus basin 1400 x 576

Gaius Sense Plus basins are made of a durable and antimicrobial composite material. The 1400 mm width provides a broad tabletop, with capacity to add a wall-mounted cabinet below the tapered end. The basin is seamless, with fixed rails in front to support standing and ease approach. The angle of the front rim ensures that splashes stay inside the basin. Additional accent-colour strips are available for the rails to promote better spatial recognition. The basin design embodies the new European PMR standard, which requires 300 mm of empty space below to allow for wheelchair access. A toilet paper dispenser, a white pop-up drain plug, fixed water trap and mounting hardware are included with the basin.

Right- and left-handed basins are available, classified by the direction of the tapered tail. The recommended mounting height is 800 mm.

992600	Accordion pipe for water trap (for electrical and crank height adjustable basins)

Original basin 1000 x 500

Original basins are made of a durable and antimicrobial cast marble. The classic basin has fixed rails in front to support standing and ease approach. The angle of the front rim ensures that splashes stay inside the basin. Rails are available in different accent colours to promote better spatial recognition.

A toilet paper dispenser, wall brackets and fixed water trap are included with the basin. Mounting hardware is sold separately. Manual and electronic height adjustments and bidé showerheads are available for the model.

Original basin and rails sustain 230 kg of weight (VTT (RTE 3664/01)). Right- and left-handed basins are available, classified by the direction of the tapered tail. The recommended mounting height is 800 mm.

Dimensions: W 1000 mm x D 500 mm
(overall depth to the outer edge of the rail 570 mm)

Lyon basin

Lyon basins are made of a durable and antimicrobial cast marble. The basin is suitable for a variety of operational environments, including public bathrooms, patient rooms, reception areas and for home. This versatility derives from the hygienic and elegant design. A fixed water trap and mounting hardware are included. The recommended mounting height is 800 mm.

Dimensions: W 598 mm x D 525 mm x H 164 mm

6406AM Lyon basin, no railing, the height of the front edge of the basin is 100 mm

Aino basin 800 x 555

Aino basins are made of durable and antimicrobial cast marble. The basin is specially designed for wheelchair patients in cooperation with the Käpylä Rehabilitation Centre SYNAPSIA of the Finnish Association for the Disabled. Its design includes sufficient leg space and plenty of tabletop space for elbow support. The Aino basin is suitable for both homes and public bathrooms, as it is easy to clean and hygienic.

A toilet paper dispenser, fixed water trap and wall brackets are included. Mounting hardware sold separately. The recommended mounting height is 800 mm.

Dimensions: W 800 mm x D 555 mm

CABINETS

Stylish Gaius cabinets are designed to withstand active use and humid bathroom conditions. The range includes a variety of storage, hand towel and soap dispenser options. Functionality of the bathroom is maximised with a correctly chosen cabinet. Special requirements of a location determine the customisation necessary.

CABINETS

High Gaius cabinets

Gaius cabinets are customisable to different individual needs. The wall-mounted cabinets ease cleaning in humid bathroom conditions. The white moisture-resistant melamine frame ensures longevity in active use. The doors are made of high-pressure laminate with additional grey accent strips along the edges to promote spatial recognition. Orientation of the doors is changeable.

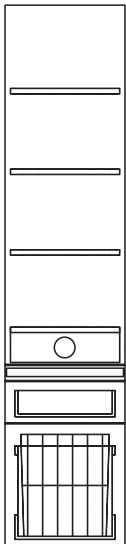

The cabinet can be customised to include a lock hole, suitable for an Abloy or cabinet lock. Such modification requires identification of preferred door orientation with order.

Gaius cabinet 6300

The cabinet frame is white, moisture-resistant 16 mm melamine, which ensures longevity in active use. The cabinet model 6300 consists of two stationary shelves, handrail, with a pull-out laundry basket and drawer. The cabinet includes a fixed enclosing that can be fitted with an electrical outlet. The doors are made of high-pressure laminate with additional grey accent strips along the edges to promote spatial recognition. Orientation of the doors is changeable.

Dimensions: W 400 mm x H 1800 mm x D 500 mm

SEATS

Shower seats transform washing into a safe and easy activity. The folding seat requires minimal space. Suitable especially for elderly people or those with reduced mobility.

SHOWER SEATS

GAIUS
CARE

17412R + 17414R

Sense shower seats

The dynamic and antimicrobial Sense shower seat allows for customisation to individual needs. The adjustment lever allows for two-step height modification. The hidden hinges of the seat make folding up easy, and keep the seat upright without additional locking mechanisms.

The seat design ensures safety, ease and cleanliness during use. The hygienic properties of the seat and its complementary parts are key elements of the design. Mounting hardware sold separately.

Features:

- Unloading mechanism aids with folding
- Easy and fast to install
- Height adjustment range with armrests 160 mm, and without armrests 300 mm
- Armrests can be moved separately
- Backrest
- Shower seat withstands min. 400 kg, armrests 80 kg per rail
- Colour options include red and grey
- Seat with hole provides further comfort to washing

Mounting hardware is sold separately.

Sense shower seat, fixed

The Sense fixed shower seat is ideal for locations where space is scarce. The folded seat occupies only 140 mm of space. The tilted surface channels excess water off the seat.

The antimicrobial, elastomeric coating combined with hidden hinges assist cleaning. Hidden hinges also make folding up easy, and keep the seat upright without additional locking mechanisms.

Dimensions:

MIRROR CABINETS, MIRRORS AND LIGHTS

MIRROR CABINETS

Korpinen mirror cabinets

Korpinen mirror cabinets come equipped with a straight or tilted mirror, which allows for wheelchair users and children to see themselves. The door has sturdy hinges and a lock, but can also be fitted with a magnetic closure. Right-handed cabinet doors are standard, but left-handed alternatives are available as a special order. Further customisation is possible using different bases. An additional light fixture is also available.

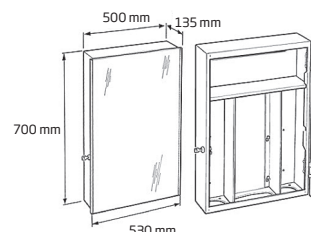

The moisture-resistant frames of Korpinen mirror cabinets derives from the 0.7 mm electro-galvanised steel sheet with additional antimicrobial properties.

Korpinen 500 mm mirror cabinets

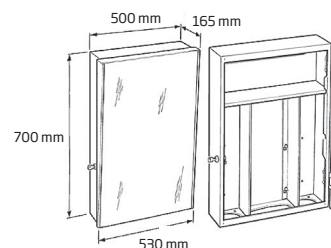

- 9511W Mirror cabinet, W 500 x H 700 x D 135 mm, straight mirror door, with no base, one shelf and a paper towel holder

BABY CARE

Baby changing station

The wall-mounted baby changing station provides a safe and steady surface for baby care. The concave base and seat belt prevent falling. Load-bearing capacity of 15 kg. The spring mechanism allows for easy and smooth opening and closing of the base board.

The base also has a built-in disposable protective paper dispenser, sold separately.

Mounting hardware is included. The design of the hinges eliminates the threat of fingers getting stuck. The station is made of polyethylene plastic which repels odours and bacteria. The closed structure also facilitates cleanliness.

Dimensions:

- Closed; W 890 mm x H 550 mm x D 102 mm
- Depth when opened 520 mm

Child protection seat

The foldable child protection seat is made of polyethylene plastic which rejects odours and bacteria.

The wall-mounted seat has hidden wall mountings for the entire width of the seat. The seat has nylon seat belts. Load-bearing capacity of 22 kg when installed correctly.

Dimensions::

- Closed; W 476 mm x H 311 mm x D 143 mm
- Depth when opened 317 mm

TOILET SEATS AND ADDITIONAL EQUIPMENT

Duo electrically adjustable toilet seat

The Duo electrically adjustable toilet seat is made of antimicrobial stainless steel. The petite design of the Duo is coupled with power to lift up to a 200 kg load.

The variety of potential configurations of the seat makes it functional for residents and personnel. Electrical or manual height adjustment range 200 mm.

The seat is customisable with integrated support rails with antimicrobial elastomeric gripping surfaces. Additional customisation regarding the depth of the toilet seat, available in 500 and 710 mm.
